PROJECT

Project title : WanderNest – Online Hotel & Property Renting Platform

Tools : HTML, CSS, PHP, MySQL

Description: WanderNest is a mini web-based platform where users can search and book rental properties for a short day. Property owners can add their hotels/rooms, upload images, set rent and availability. The system allows customers to view details, give ratings, and submit reviews after their stay

Experience

- No professional work experience yet. Currently gaining skills through academic learning and hands on projects.
